SUMMARY

Experienced in architecting production-ready internal platforms, from Python automation to cloud-native web applications. Skilled in building the foundational tools and CI/CD pipelines that bridge the gap between development and global deployment.

EXPERIENCE

Automation Engineer | SysAid Technologies | 2025 – Present | London

- **Architected a scalable deployment platform** supporting 29 components, designed to enable seamless growth and standardize release workflows (Python, Github Actions)
- **Designed a dual-routing architecture** with a centralized component registry to enable incremental system migration without disrupting weekly release cadence (Python, Github Actions, Kargo)
- **Built an internal AI-powered translation tool** leveraging AI-driven translation across multiple languages (TypeScript, Docker)
- **Designed a centralized test-results database** and CI ingestion pipeline, enabling cross-environment visibility, failure classification, and trend analysis (SQL, TypeScript, Jenkins)
- **Automated end-to-end release coordination** across 14 repositories and a 6-service monorepo (Python, REST API)
- **Built AI-assisted Claude Code tools** for incident investigation and test triage, reducing mean time to root cause

Data Analyst | AFFILOMANIA | 2020 – 2021 | Tel - Aviv

- **Enhanced lead distribution** processes, achieving a 15% increase in sales through data-driven strategies
 - **Analyzed complex data sets** using Tableau and derived actionable insights that informed strategic decision-making
-

PROJECTS

Pitch Star – FIFA Soundtrack iOS Quiz App | Swift, SwiftUI, Firebase | github.com/Yoavsb25/fifa-songs-app

- **Built an iOS quiz app** that challenges players to identify FIFA video game soundtrack clips by year, drawing on 25+ years and 800+ tracks from EA Sports' music catalog
- **Designed a native SwiftUI app** with a freemium subscription model and cloud-synced daily challenges

Files-Unifier for Goldfarb Gross Seligman Law Firm | Python, GitHub Actions | github.com/Yoavsb25/files-unifier

- **Built and sold a desktop batch-processing tool** to a leading law firm, now used internally for document workflows
 - **Designed a modular pipeline architecture** with observability, license management, and automated testing, packaged as a standalone executable
-

EDUCATION

B.Sc. Computer Science & Entrepreneurship | Reichman University | 2022 - 2025

- Psychometric Entrance Test (SAT equivalent): **721** (Top 2% nationwide)
 - Notable Coursework: Machine Learning (**88**), Operating Systems (**92**), Product Management (**94**)
-

SKILLS

- **Languages:** Python (OOP, type hinting, ruff), TypeScript, JavaScript, SQL, Bash, C
 - **Backend & APIs:** Flask, Django, Express, REST API
 - **Infrastructure & DevOps:** Docker, AWS, GitHub Actions, CI/CD, ArgoCD/Kargo (GitOps), Linux
 - **Frontend:** React, Vite
 - **Testing & Tooling:** Claude code, Cursor, Pytest, Playwright, Vitest, Git/GitHub
-

VOLUNTEERING & EXTRACURRICULAR ACTIVITIES

- **Code4good** – developed tech solutions to optimize nonprofit operations and drive social impact
- **Reichman Football Team** – Key team member, demonstrating leadership, teamwork, and competitive excellence
- **International Football Delegation** – Brazil 2014 – diverse delegation promoting coexistence and cultural exchange
